### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aslam A. Jaffery, Reg. No. 51,841 on March 3, 2006.

2. The application has been amended as follows:

In the specification: Please replace paragraph in p. 5, lines 5-10 with:

-- A machine-readable medium is understood to include any mechanism for storing information in a form readable by a machine (e.g., a computer) such as read only memory (ROM); random access memory (RAM); magnetic disk storage media; optical storage media; flash memory devices; electrical, optical, acoustical; as well as for transmitting information in a form of propagated signals such as carrier waves, infrared signals, digital signals, etc. --

In the claim: Please amend claim 33 as follow:

33. An apparatus comprising:
  - a main system coupled with a main storage device, the main system including a main operating system (O/S);
  - a subsystem coupled with a subsystem storage device;
  - a subsystem boot indicator; and
  - a boot up controller to access the subsystem boot indicator and initiate a booting of the subsystem based upon the subsystem boot indicator, wherein the booting of the subsystem

Art Unit: 2116

includes retrieving information from a first storage device and transferring the retrieved information to a second storage device, wherein the retrieving and transferring are to be performed by a main system resource without the use of the main O/S.

***Reasons for Allowance***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Owens et al. [Owens] (EP 0592079A2) discloses a system for automatically installing software and configuring operating environment on a computer system.

4. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguishes over the prior art for the following reasons. The claims are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious the method for booting a subsystem comprising, among other steps, the steps of transferring boot information, included in a computer system, to the subsystem based on a retrieved subsystem boot indicator, wherein the transferring is performed independent of a main operating system and a main system included in the computer system; and booting the subsystem independent of the main system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
